

Hair Styling

Objectives: At the end of this chapter following task learned will receive

- Different types of traditional hairstyling
- Bank Coming and Back Brushing
- Different types of braiding
- Bridal hairstyles.

Purpose of hair styling

- The practice of grooming hair has been going on since ancient times. Hair grooming is a requirement used by every woman.
- Hairstyling is an art that requires a hairstylist to have knowledge of hair structure, type of hair thickness, length and condition. "Knowledge of various tools and accessories used in hair styling should be according to fashion."
- An accomplished hairstylist, keep in mind the time, age, requirement etc. while making the hairstyle.
- Use and maintenance of electrical equipment

Types of hair styling

It is divided into two parts to understand hair styling in detail.

- Traditional hair styling
- Dry and wet hair styling"

Traditional hair styling"

Under this, interlocks, pinks, finger waving, rolls, twisting etc. These hair styles are used according to the time, age, requirement and function of the customer. These hair styles depend on the texture, length, condition and thickness of the hair."

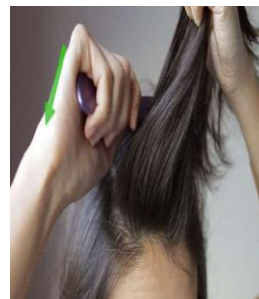

Back combing and back brushing"

To give volume to the hair styling, it is given more or less according to the shape, age, body texture, etc. of the face. Emergence, ie back combing and back combing, is also known as Oulti comb. According to this method, hair is stirred as needed."

process :

- Brush in hair. Raise the braided hairs at 90 ° from their place with tail comb at the place where you want to bulge."- After combing these hairs, go towards the foreskin. In this activity, there is a type of tangling in the hair which helps in raising.

- Clean the hair coming from your place upwards towards the head with a little comb to make the hair look natural.
- This technique is commonly used to make the forelock and interlock ahead of the hairline ear.

Removal of back combing and back brushing“

- There is a special method of opening or removing back comings, which the customer must tell.

With the help of the tail of the tail comb, lift these special hairs with a light hand and open the back comings on the outside.

- In this method hair does not break and back combing opens easily.“

“Braiding““

Bridal hair style“Bridal hairstyle is a type of traditional Indian hairstyle that is used in today's bride's hair styling. Further hair styling is done to see more bulge and puffiness in the hair. Braiding can be given before and behind the ear as required. Rolls or interlocks are provided with a hairstyle made in the back hair. It is decorated with flowers, ghajars and ornaments.

This is a type of hairstyling method. This is done with the help of fingers and tail comb to decorate the hairs ahead of the head. Sometimes this action can also be used on the back hair. If the hair is cut or upside-down (uneven), you can moisten the hair with a little hair spray so that the hairstyle that you see is clean. Braiding can be given by several methods such as French braid and Twisting braid etc.“

Thermal Hair Styling

Objectives: At the end of this chapter following task learned will receive
